CONFIDENTIAL

Polish Fisheries Cooperation

Poland has fisheries cooperation agreements with six less developed countries, four of which are located in Latin America. The agreements center on setting up joint deep sea fishing ventures and conducting research. Although Warsaw has promised assistance for port and processing facilities in several LDCs, all the projects are still on the designing state. Warsaw has expressed interest in securing additional multilateral and bilateral participation for these onshore facilities and it is doubtful whether Poland's final financial commitments to the projects will be large.
